A NOTE FOR YOU

Laura, we looked at your photos and X-ray together. We suggest four implants: for the missing front tooth, the two missing back teeth and the lower molar that cannot be saved. You leave the first visit with a temporary front tooth, so there is no gap while the implants heal. A gentle internal sinus lift gives the upper back implant a secure base. The zirconia crowns follow about three months later. The two options differ only in the implant brand; the treatment and the team are the same.
